

Lab 4 Visual Elements and Graphics [20 points]

Objectives

- Create and format lines and borders on web pages.
- Apply the image element to add graphics to web pages.
- Configure images as backgrounds on web pages.
- Configure images as hyperlinks

Preparation

- Read Chapter 4 of the textbook

What to do

1. [8 points] Design a web page about your favorite musical group with at least two sections. Use a good text color and a good background color for the page and use a background image and a good text color and a good background color for each section heading of the page. Create a border and apply appropriate padding for each section heading. Search the Web for a free photo of the group if there is.

Include the following information about the group on your web page:

- Name of group
- Type of music
- Names of principle group members
- Photo of group (optional)
- Link to another web page with information about the group.
- Save the page as musicgroup.html
- Save the external style sheet as site.css

2. [6 points] Complete the Website Case Study: **JavaJam Coffee Bar** in of Focus on Web Design section of chapter 4 of the textbook.

3. [6 points] Complete the Website Case Study: **Pacific Trials Resort** in of Focus on Web Design section of chapter 4 of the textbook.
