

CPSC 1045 Project Breakdown

Project Submissions should include:

1. HTML and JavaScript files
2. Project final report documents

The project will be evaluated based on perspectives as follows:

1. Game Design, such as game mechanism design, graphical design
2. Number and quality of the optional features designed
3. Quality of the code, such as correctness, readability, organization, efficiency
4. Report quality, such as writing, readability, formatting
5. Your overall original contribution in this project

In your HTML and JavaScript files, please include necessary comments to explain each section of your code briefly.

In the project final report document, please include the following sections:

- A) Development Description: This section describes your development of the game: the overall game that you designed, the objectives of the game, the concepts you used in the game that we learned this semester
- B) User Manual: A section that includes the instructions for the player to play the game
- C) References: This section contains a list of sources (e.g., games, websites, tutorials) that you learned from.

The overall length of the report document should not exceed 4 pages.
