

2) Hands-On Exercises number 2 question b

3) Hands-on Exercises number 3 question b

4)

- Hierarchical Organization is used for the JavaJam website.
- I think it is the most appropriate organization because it is a commercial website. Customers can easily change pages, which is pretty convenient.

Page Layout

1. ✓ Appealing to target audience
2. ✓ Consistent site header/logo
3. ✓ Consistent navigation area
4. ✓ Informative page title that includes the company/organization/site name
5. ✓ Page footer area includes copyright, last update, contact e-mail address
6. ✓ Good use of basic design principles: repetition, contrast, proximity, and alignment
7. ✓ Balance of text/graphics/white space on page
8. ✓ Good contrast between text and background
9. ✓ Home page downloads within 10 seconds on a mobile device
10. ✓ Viewport meta tag is used to enhance display on smartphones
11. ✓ Responsive page layout is configured for smartphone and tablet display

Browser Compatibility

12. ✓ Displays on popular/current versions of Microsoft Edge
13. ☐ Displays on current versions of Firefox
14. ✓ Displays on current versions of Google Chrome
15. ☐ Displays on current versions of Opera
16. ✓ Displays on current versions of Safari (both Mac and Windows)
17. ☐ Displays on popular/current versions of Internet Explorer
18. ☐ Displays on popular mobile devices (including tablets and smartphones)

Navigation

19. ✓ Main navigation links are clearly and consistently labeled
20. ✓ Navigation is easy to use for target audience
21. ☐ If main navigation uses images, clear text links are in the footer section of the page
22. ☐ If main navigation uses media, clear text links are in the footer section of the page
23. ☐ Navigation is structured in an unordered list
24. ☐ Navigation aids, such as site map, skip navigation link, or breadcrumbs are used
25. ✓ All navigation hyperlinks "work" — are not broken

Color and Graphics

26. ✓ Color scheme is limited to a maximum of three or four colors plus neutrals
27. ✓ Color is used consistently
28. ✓ Text color has [sufficient contrast](#) with background color
29. ✓ Color is not used alone to convey meaning
30. ✓ Use of color and graphics enhances rather than distracts from the site
31. ✓ Graphics are optimized and do not significantly slow download
32. ✓ Each graphic used serves a clear purpose
33. ✓ Img element tags use the alt attribute to configure an alternate text description
34. ☐ Animated images do not distract from the site and do not endlessly repeat

Multimedia

35. ☐ Each audio/video file used serves a clear purpose

- 36. ☐ Any animation used enhances rather than distracts
- 37. ☐ Captions are provided for each audio or video file used
- 38. ☐ If needed, links to downloads for media plug-ins are provided

Content Presentation

- 39. ✓ Common fonts such as Arial or Times New Roman are used
- 40. ✓ No more than one web font is used
- 41. ✓ Techniques of writing for the Web are used: headings, bullet points, brief paragraphs
- 42. ✓ Fonts, font sizes, and font colors are consistently used
- 43. ✓ Content provides meaningful, useful information
- 44. ✓ Content is organized in a consistent manner
- 45. ✓ Information is easy to find (minimal clicks)
- 46. ✓ Timeliness: The date of the last revision and/or copyright date is accurate
- 47. ✓ Content does not include outdated material
- 48. ✓ Content is free of typographical and grammatical errors
- 49. ☐ Content provides links to other useful sites
- 50. ✓ Avoids the use of "Click here" when writing text for hyperlinks
- 51. ✓ Hyperlinks use a consistent set of colors to indicate visited/nonvisited status
- 52. ✓ If graphics are used to convey meaning, the alternate text equivalent is provided
- 53. ✓ If media is used to convey meaning, the alternate text equivalent is provided

Functionality

- 54. ✓ All internal hyperlinks work
- 55. ✓ All external hyperlinks work
- 56. ✓ All forms function as expected
- 57. ☐ No JavaScript errors are generated

Accessibility

- 58. ☐ If main navigation uses images or other media, text links are in the footer section of the page
- 59. ☐ Navigation is structured in an unordered list
- 60. ☐ Navigation aids, such as site map, skip navigation link, or breadcrumbs are used
- 61. ✓ Color is not used alone to convey meaning
- 62. ✓ Text color has [sufficient contrast](#) with background color
- 63. ✓ Img elements use the alt attribute to configure an alternate text description
- 64. ✓ If graphics are used to convey meaning, the alternate text equivalent is provided
- 65. ☐ If media is used to convey meaning, the alternate text equivalent is provided
- 66. ☐ Captions are provided for each audio or video file used
- 67. ☐ Use attributes designed to improve accessibility such as title when appropriate
- 68. ☐ Use the id and headers attributes to improve the accessibility of table data
- 69. ☐ Configure frames with frame titles and place meaningful content in the noframes area
- 70. ✓ The html element's lang attribute indicates the spoken

- Three design practices that have been well implemented: Page layout, Functionality, Content Presentation.
- Three design practices that could be implemented in a better way: Browser compatibility, Accessibility, Navigation.
- Since this is a commercial website, it should have an order page so that customers can purchase their products. Besides, the website can be improved by adding some images related to the menu so that customers can see what the products look like, which helps them make a best decision.
