

Lab 2 HTML Basics [20 points]

Objectives

- Create simple HTML web pages
- Use description lists, unordered lists, and ordered lists.
- Insert hyperlinks to text.
- Format web pages.

Preparation

- Read Chapter 2 of the textbook

What to do

1. [6 points] Create a personal web page. Use a text editor to create a web page about yourself. Save the page as **index.html**.
 1. Name the title of your personal web page as YourName's Home Page. Replace YourName with your name.
 2. Add an appropriate heading to your page.
 3. Use a short paragraph to give yourself a brief introduction.
 4. Use a list (a description list, an unordered list, or an ordered list) to list all the courses you are currently taking. Add an appropriate heading to the course list.
 5. Use another list to list your favorite websites. Insert a hyperlink to each of your favorite websites. Add an appropriate heading to the list of favorite websites.
 6. Test your web page using a web browser and validate your code before submission.
2. [7 points] Complete the Website Case Study: **JavaJam Coffee Bar** in of Focus on Web Design section of chapter 2 of the textbook. Task 1: [1 point], Task 2: [3 point], Task 3: [3 point]
3. [7 points] Complete the Website Case Study: **Pacific Trails Resort** in of Focus on Web Design section of chapter 2 of the textbook. Task 1: [1 point], Task 2: [3 point], Task 3: [3 point]

Submission:

Create the folder that contains the three folders of the task 1,2 and 3. Zip the folder and submit to Brightspace.
