

Lab 8: Mobile Design, Table and Forms [20 points]

Objectives

- Enrich the content of the project
- Practise CSS for mobile display
- Add tables to project

What to do

1. [10 points] Continue to enrich the content (e.g., text content, graphical content, hyperlinks) and improve the layout on large screens of the webpages of your project website.
2. [4 points] Complete the Web Project (Hands-on Practice Case) in **Web Project** section at the very end of chapter 8 of the textbook to include styled tables in your website.
3. [6 points] Follow the instructions to make your website home page mobile friendly.
 - a. Configure media query to optimize your site for mobile devices display.
 - b. Add a viewport meta tag for each of your webpage.
 - c. Show your pages in a desktop/laptop browser. The pages should look the same as they did before. Next, display your pages with a small screen resolution. Your pages should be optimized for mobile display.

Submission:

Submit one zipped folder that contains the html and css files of the pages required to Brightspace
